Columbus, OH

# process

Creating your own custom tile is easy! The process starts with your vision and ends with a beautiful, durable, commercially rated ceramic or porcelain tile. In a few easy steps Imagine Tile will help you imbue any space with your design vision.

*Let your imagination run tiled!*

- ✓ **design:** provide imagine tile with a concept or ready-to-go artwork, including color references. If artwork is not available, we'll work with you to develop the final artwork.
- ✓ **sample:** once artwork is finalized, we will proceed with making a physical tile for review and approval before production. The sample process takes approximately 3-4 weeks. If any revisions are needed, we'll create a new sample.
- ✓ **production:** after review and approval of the sample tile, your order is ready for production. Allow approximately a 4-6 week lead time to produce your custom tile.

Imagine Tile's custom tiles are the perfect solution for any surface; commercial or residential. From unique colors, patterns and textures, to the replication of encaustic design, and even photographic images, our tiles are a unique and versatile surfacing solution able to totally transform any space through design. Perfectly suited for applications such as hospitality, retail, corporate, healthcare, transportation and more.

# custom tile
